PROFESSIONAL SUMMARY

Creative and detail-oriented front-end focused Software Developer with extensive experience creating responsive, user-friendly web applications using modern technologies across healthcare and enterprise level domains. Skilled in HTML5, CSS3, JavaScript, React JS, Redux and Tailwind CSS, with a proven ability to convert UX/UI designs from tools like Zeplin and Figma into interactive, modern websites. Proficient in integrating RESTful APIs and GraphQL services into frontend applications, while ensuring performance optimization, responsiveness, and cross-browser compatibility. Experienced in code quality through unit testing with Jest and component isolation using Storybook. Also gained experience in Microsoft Power Platform, including customizing Power Pages with JavaScript, creating interactive Power BI visuals using D3.js, and automating workflows via Power Automate. Adept at working in Agile environments, contributing to sprint planning, daily stand-ups, and iterative delivery. Currently expanding expertise through a Level 7 part time Cloud Engineering Diploma, gaining hands-on knowledge in Azure and AWS, with a focus on AI-driven cloud development and DevOps. Passionate about staying updated with industry trends

SKILLS

- **Front-End Technologies:** HTML5, CSS3, JavaScript, React.js, Next.js, D3.js Tailwind CSS, Material UI
- **Cloud & DevOps:** AWS (ECS Fargate, ECR, CodePipeline, CloudFormation, CloudWatch, S3, IAM), Azure (AI Foundry, Azure ML), Docker, CI/CD Pipelines, Blue/Green Deployment
- **Microsoft Power Platform:** Power Pages, Power BI, Power Automate, Dataverse
- **API Integration:** RESTful APIs, GraphQL
- **Testing & Development Tools** - Storybook (component isolation), Jest (unit testing)
- **UI/UX Design Tools:** Adobe Photoshop, Adobe Illustrator, Figma, Canva
- **Animation Libraries:** Three.js, Framer Motion
- **Build Tools & Package Management:** Webpack, NPM, Yarn, Vite, Parcel
- **Version Control & Collaboration:** Git, Agile Methodology, Confluence, Miro, JIRA, Slack, Zoom, Office 365.
- **AI-Powered Development Tools:** GitHub Copilot (VS Code), Claude code, ChatGPT, Cursor

Software Developer (Contract)

May 2025 – July 2025

Ava Tech, New Zealand

- **Client-Programmed (Australia):** Developed customized [Power Pages](#) solutions by integrating dynamic form elements, advanced JavaScript autocomplete functionality, seamless Dataverse interactions
- **Client-Port Otago:** Created interactive and customized [Power BI](#) visuals, involving complex data visualizations using D3.js and TypeScript to enhance reporting and analytical capabilities.
- **Client-Elegant Spaces:** Automated invoice workflows using [Power Automate](#) with custom OAuth 2.0 connectors for secure integration with external accounting systems

Software Developer Intern

February 2024 – February 2025

MVP Studio, New Zealand

- **Project: E-Commerce Shopping Application** - <https://ecommerce-shopping-app-sandy.vercel.app>
 - Built a scalable React e-commerce app with modular components, product listing, sorting, filters, cart, wishlist, debounced search, optimized rendering, and Local Storage persistence.
 - Improved reliability and collaboration by implementing Jest unit tests for component validation and using Storybook to document and test UI components in isolation.

UI Developer (Contract)
One Second Insight Ltd, New Zealand

September 2023 – October 2023

- Built interactive data visualizations using D3 JS.
- Converted Figma designs into responsive web interfaces using HTML5 and Tailwind CSS.

Web Developer
Wipro Limited, India

December 2021 – May 2023

- **Client: Surya Hospitals (India)** - Developed and managed React components using JSX and CSS, implemented Redux for centralized state management, optimized asynchronous data handling with async/await, performed extensive front-end testing, and prepared technical documentation.
- **Client: TC Energy (Canada)** - Collaborated with SAP support teams on SAP Portal and SAP UI5/Fiori elements projects. Developed and enhanced UI components using JavaScript, HTML5, CSS3, and SAPUI5 framework

Career Break
Maternity Leave

August 2016 – November 2021

- Stayed connected to the industry through freelance graphic design projects and advanced training, creating logos, marketing materials, and digital assets for small business clients

Web Development Engineer
Verixo Technologies Pvt Ltd, India

January 2015 – July 2016

- **Client: WOW Fitness (India)** - Developed E-Fitness (fitness goals application) and E-Desk (customer support activities application) using JavaScript.
- Implemented responsive web design using Bootstrap framework and CSS media queries to ensure optimal viewing across all devices. Integrated dynamic form validation and user authentication systems for secure user data management

Graduated Programmer
Xecom IT, India

July 2013 – December 2014

- Designed and developed responsive websites using HTML, Bootstrap, and WordPress, including custom theme development, plugin integration, and PHP/MySQL database implementation with cross-browser and mobile optimization.
- Managed comprehensive web hosting solutions including DNS configuration, domain management, and server setup through GoDaddy and other hosting platforms

EDUCATION

Diploma in Cloud Engineering (Level 7) (Part Time Remote)
Yoobee Colleges Limited, New Zealand

October 2025 – May 2027

Software Development Course
Industry Connect, New Zealand

January 2024

Bachelor of Computer Engineering
Pune University, India

June 2013
